Department of Pediatrics & Child Health
University of Manitoba

Subject: Locum Help needed in Pediatric Gastroenterology & Pediatric Endocrinology

Dear Colleagues,

Our Department has 3 GFT vacancies in the **Section of Pediatric Gastroenterology** with no full time pediatric gastroenterologist currently on staff and our **Section of Pediatric Endocrinology and Metabolism** has now only 2 fulltime pediatric endocrinologists. Our waiting lists for Pediatric Endocrinology consultation has now reached 10 months. We are actively recruiting to both areas!

I am asking for your help in identifying any Department member in either of these Sections who might be willing to come to Winnipeg to do a locum placement. Kindly share this request with your Section (Division) Heads and please let me know if any body can help out. Please note that we will cover all expenses including airfare, licensure and CMPA as needed in addition to clinical stipends. Many thanks for any help you can provide.

Warm regards,

Sincerely,

Cheryl Rockman-Greenberg, MD, CM, FRCPC, FCCMG
