Anne Monique Nuyt is neonatologist and senior clinician-scientist at CHU Ste-Justine, Montréal. Dr Nuyt's research team studies risk of cardiovascular diseases in children and adults who were born preterm. Her translational research program spans from experimental animal work, to clinical as well as epidemiological studies. She leads the HAPI (Health of Adults born Preterm Investigation) cohort study with Dr Thuy Mai Luu, and launched the Quebec Research Network in Perinatal Determinants of Children Health with Dr Sylvana Côté. She holds the Cercle de Sainte-Justine DOHaD Research Chair and a Tier 1 Canada Research Chair in Prematurity and Developmental Origins of Cardiovascular Health and Diseases.

She is currently Professor of Pediatrics and Chair/Chief of the Department of Pediatrics at CHU Sainte-Justine/Faculty of Medicine Université de Montréal. She recently completed her mandate as chair of the advisory board to the CIHR Institute for Human Development, Child and Youth Health. Her research is funded by CIHR and Heart and Stroke Foundation of Canada. Dr Nuyt was awarded a number of prizes for her work, is actively involved in scientific societies in perinatal as well as adult cardiovascular research, and in mentoring both clinicians and scientists.
